

Cowbridge School Newsletter

This week at Cowbridge School ...

This week, our educational journey has taken students of all ages beyond the school gates, providing them with invaluable opportunities to connect their classroom learning with the wider world.

Our Reception classes embarked on an exciting Geography field trip, walking into the heart of Cowbridge. For many of our youngest pupils, this was a fantastic introduction to local geography and community awareness. Seeing their enthusiasm as they identified landmarks and observed the bustle of our local town was truly heartening. These early experiences of exploration are fundamental in building their curiosity and understanding of the environment around them.

Further afield, a group of our Year 10 students attended the Women in Maths conference at

Cardiff University. This was an inspiring day designed to encourage young women to pursue mathematics and related fields at a higher level. Our students engaged with challenging concepts and heard from leading mathematicians, providing them with a glimpse into the vast array of career paths that a love of numeracy can unlock. Seeing them represent the school with such intellectual curiosity at a prestigious university was a proud moment for the staff involved.

Have a lovely weekend!
