

Cowbridge School Newsletter

This week at Cowbridge School ...

This week at Cowbridge School, we have once again seen our pupils demonstrating remarkable dedication, scientific curiosity, and high-level problem-solving skills across the curriculum.

Our Year 11 Food and Nutrition students undertook their Food and Nutrition Science Investigation. It was fantastic to see them engaging so thoroughly with the practical and analytical aspects of the task, applying scientific principles to understand the functional and chemical properties of ingredients. Their focus, attention to detail, and methodical approach throughout the investigation were truly commendable.

In addition to our practical science activities, academic challenge was in full swing mid-week as twenty-one of our talented mathematicians participated in the Senior Maths Challenge on Wednesday. Taking on this prestigious national competition requires significant critical thinking, mathematical resilience, and

creative reasoning. We are immensely proud of all the students who stepped up to take on such a demanding intellectual test, and we look forward to hearing their results in due course.

Whether in the practical laboratory setting or tackling complex mathematical problems, our students continue to uphold the high standards of ambition and effort that make our school community so proud. Well done to all!

Finally, if you are looking for something to do this weekend, why not pay a visit to your local bookshop. Saturday, 10 October is Bookshop Day but it is also World Mental Health Day. The links between reading and positive mental health are evident so why not take some time out to choose something new to read.

Have a lovely weekend!
