About GE Aerospace

We believe the world works better when it flies. We are a world-leading provider of jet engines, components, and integrated systems for commercial and military aircraft. Our rich history of inventing the future of flight, our continual investment in research and development, and our talented and innovative people will enable us to rise to the challenge of building a world that works with industry-leading technology and innovation. In fact, we're already developing our next-generation of technologies to achieve greater fuel efficiency and reduce CO2 emissions with an ambition to be a net-zero company by 2050.
