

Cowbridge Lower School Newsletter

23.5.25

This week Lower School has been buzzing with excitement as we celebrated World Bee Day.

We have all learnt about the importance of bees and just why we can't live without them. In their honour, we said "thank you" by holding a very special honey pot party to show our appreciation for these amazing insects. It was a hive of activity as we made party hats, danced like a bee to the Flight of the Bumble Bee, tasted honey on toast and ate biscuits decorated just like bees!

We also celebrated National Numeracy Day and used our "Maths Eyes" to find all things maths around us and ask questions about what we saw.

Nursery also practised their number skills counting and putting balls of honey in the right part of the bee hive. They created their own repeating patterns on their party hats and used their own ideas to complete the sentence "Bees are important because.....".

Reception read the story The Very Greedy Bee. They learnt about hexagons and how they all fit together to make a hive. They made their own "Save the Bee" posters, sequenced the life cycle of the bee on their party hats and reinforced their doubling and halving skills.

The stripy creature theme continued in Year 1this time of the feline variety in the form of tigers who came to tea! They designed a new label for a tin of tiger food and produced a persuasive argument as to why the tiger should eat the tin of tiger food and not the food in the cupboards...let's hope it worked!

Wishing all our families and friends a wonderful half term and hoping a tiger doesn't knock on your door!!!
